

# FIGHT COVID

With Children of India Foundation

## Who are we?

We are a registered non profit in India working for the nation's extremely poor and vulnerable children

## How are our children affected?

With the outbreak of the second wave, the socio-economic condition of our children and their families has worsened. They have limited or no access to health care and COVID protection, are facing food insecurity, have lost their means of livelihood, lack awareness on managing the virus and are in a total state of panic.
